

# Technical Information

## ***MELT-O-CLEAN***

---

### **DESCRIPTION**

Melt-o-Clean is a cleaning agent based on natural resources for the application at room temperature. It is used for the cleaning of machine surfaces, application units and general machinery, specially to remove residual adhesive and heavy grease and grime.

**FLASH POINT:** 40 – 50°C.

### **PROCESSING**

**Temperature:** Application at room temperature

**Application:** Best results with Melt-o-Clean are obtained at room temperature. Carefully spray affected area and allow to react for a few minutes. Carefully remove with cloth and if necessary repeat procedure. Please observe EG-Safety Data Sheet.

**Remarks:** Before use, check if materials are suitable. Do not spray on red hot surfaces.

### **STORAGE DIRECTIONS**

Store in a dry and cool place. Store in closed original packaging for 6 months from date of production without changing product properties.

### **PRECAUTIONS**

Refer to the material safety data sheet (MSDS) before handling the product. Follow instructions for safe handling.

### **TECHNICAL SERVICE**

HENKEL ADHESIVES maintains a strong technical support group to investigate and advise on all matters of adhesion. Please contact your local Sales Office.

The information provided herein, especially recommendations for the use and the application of our products, is based upon our knowledge and experience. Due to different materials used and to varying working conditions beyond our control, we strongly recommend to carry out extensive trials to test the suitability of our products for the intended processes and applications. We do not accept any liability arising from either the above statements or any oral advice unless attributable to intention or gross negligence on our part. June, 2009
